

Session files

Engage 2024

We'd like to share the slides and demo apps we used to drive our "Delivering AI-driven solutions with Claris FileMaker: A practical overview" session at Engage 2024. The apps showcase use cases of AI-driven user experiences running on the current version of Claris FileMaker.

What's inside

This package includes a PDF of the slide deck. Additionally, a set of FileMaker demo files along with text files of the prompts used to instruct the large language models.

Each demo file examines a different use case and is provided completely unlocked so you can explore and learn at the same time. We've done our best to provide appropriate documentation and comments inside the files.

We hope you enjoy learning about FileMaker and AI. And can't wait to see what you build next.
